

Theda Clark Eye Center Participates in Extreme Makeover

"Unbelievable!" said Carol Levenhagen of Neenah, who was recently chosen from more than 100 candidates to participate in Northeastern Wisconsin's Total Transformation. As part of the Total Transformation process, she elected to undergo laser vision correction July 19th at Theda Clark. Her optometrist, Thomas Rued, O.D. of Valley Vision in Neenah, determined she was an excellent candidate for the procedure after having trouble with contact lenses in the past. Her surgeon, Michael Vrabec, M.D. of Valley Eye Associates in Appleton, then confirmed this prior to her surgery.

Carol Levenhagen (seated at right) with some of her Laser Vision Team. "My results were fantastic. I would recommend this procedure to anyone who is a good candidate. The staff was so caring and reassuring," Carol said during her follow-up visit.

Laser vision correction is designed to reduce or eliminate dependence on glasses or contact lenses. Theda Clark's Eye Center was one of the first FDA-approved sites in the nation for LASIK laser vision correction and they have been performing this procedure longer than any other eye center in the Fox Valley.

"I was so happy when I learned that the procedure would be done at Theda Clark by Dr. Vrabec," said Carol. "They have the most experience with the excimer laser in the state of Wisconsin."

The treatment was performed in front of a live audience and was taped for broadcast on WFRV TV Channel 5. To learn more about laser vision correction at Theda Clark, please call (920) 734-2020.
